PROFESSIONAL SUMMARY

Aspiring Computer Science student with hands-on experience in Python, machine learning, and data analysis, gained through academic projects and a data science internship. Comfortable building complete projects independently, working with APIs, and picking up new tools quickly. To gain practical experience in AI/ML and software development.

SKILLSET & CERTIFICATIONS

- Programming: Java
- Data & Analytics: SQL, Power BI, Excel
- APIs & Tools: REST API integration (Razorpay, Google Maps), Git, GitHub, JWT Authentication
- GUVI — SAWIT.AI Learnathon | Great Learning — Front-End Development (HTML)

PROJECTS

Flight Delay Prediction

Tech Stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib/Seaborn, Jupyter Notebook

- Built an ML model to predict flight delays from historical flight and weather data, applying classification algorithms and feature engineering.
- Run exploratory data analysis and handled missing/inconsistent data as part of the preprocessing pipeline.
- Investigated misclassified cases to identify weak features and improve model accuracy — an evaluation habit directly relevant to testing AI system outputs.

Home Booking System

Tech Stack :React (Vite), Node.js, Express.js, MongoDB, JWT, Razorpay API, Google Maps API

- Built a full-stack rental platform independently, integrating multiple third-party APIs (Razorpay for payments, Google Maps)
- Implemented-secured Admin & User modules with CRUD property management, debugging integration issues by reading official API.

DEBT DETOX-AI Powered Financial Contract Auditor

Tech Stack: Python,Streamlit,Gemini API,Ollama/Gemma,Tesseract OCR,PyMuPDF,Pydantic,NumPy,SciPy,Plotly

- Built an AI-powered financial contract auditor that extracts and verifies loan terms from documents using OCR and document grounded AI (Gemini, Ollama/Gemma).
- Developed deterministic algorithms to calculate EMI, effective borrowing cost, and repayment projections, detecting hidden charges with interactive visualizations.

INTERNSHIP EXPERIENCE

Data Science Intern-ProdigyInfoTech

May 2025

- Built data preprocessing pipelines and predictive models in Python.
- Regression analysis, classification algorithms, and data visualization tasks.
- Analyzed datasets to extract actionable insights and evaluated model performance metrics.

EDUCATION

B.E. Computer Science Engineering — National Engineering College (CGPA-6.52)	2023 – 2027
HSC - K.C.A.D. Chidambaram Gnanagiri Matric Hr. Sec. School, Sattur (60.66%)	2022 – 2023
SSLC - K.C.A.D. Chidambaram Gnanagiri Matric Hr. Sec. School, Sattur	2020 – 2021

ACHIEVEMENTS

- I solved 2000+ Problems in skillrack
- Flipkart Grid 5.0 & 6.0 Participant
- Tata Imagination Challenge Participant
